

1 · JavaScript

Apresenta problema na execução

The screenshot shows the OneCompiler JavaScript editor. The code in the editor is:

```
1 console.log(0.1 * 3 === 0.3);
2
3 console.log(9007199254740993);
```

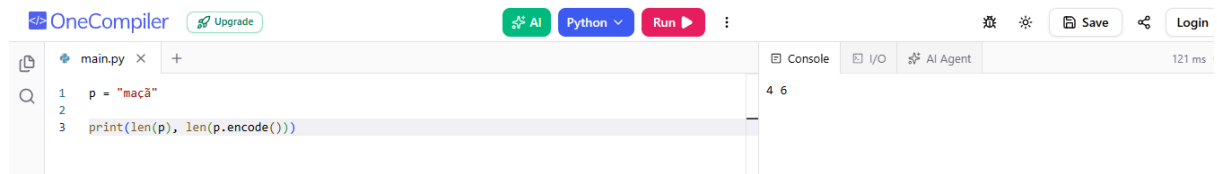

The console output on the right shows:

```
false
9007199254740992
```

The execution time is 155 ms. The error message is not visible, but the output indicates a problem with the execution of the code.

2- Python

Não aparece o erro

The screenshot shows the OneCompiler Python editor. The code in the editor is:

```
1 p = "maçã"
2
3 print(len(p), len(p.encode()))
```

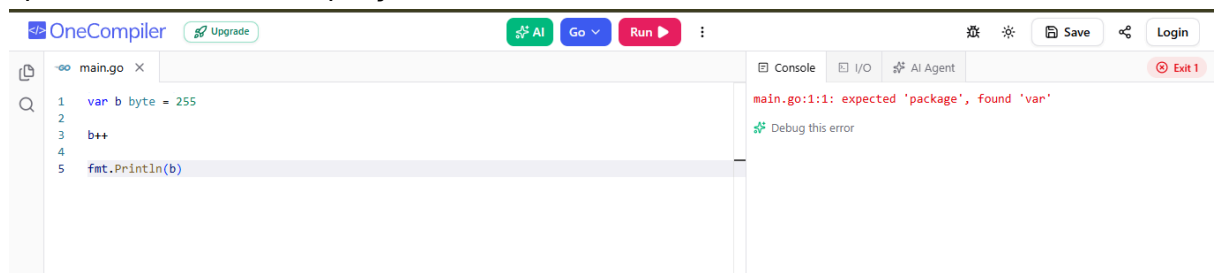

The console output on the right shows:

```
4 6
```

The execution time is 121 ms. No error message is visible in the console.

3- GO

Apresenta o erro na compilação

The screenshot shows the OneCompiler Go editor. The code in the editor is:

```
1 var b byte = 255
2
3 b++
4
5 fmt.Println(b)
```

The console output on the right shows a compilation error:

```
main.go:1:1: expected 'package', found 'var'
```

The error message is "main.go:1:1: expected 'package', found 'var'". The console also shows a "Debug this error" link.
